Education

2019-present **Stanford University**
Ph.D. Candidate in Physics
      Advisor: *Prof. Kent Irwin*
M.S. in Physics completed in June 2022

2015-2019 **University of California, Berkeley**
B.A. in Physics. Graduated with High Distinction in General Scholarship and Departmental Honors
Thesis Title: *Resonant Axion-Photon Scattering and Galactic Searches for Axions*
      Advisor: *Prof. Karl van Bibber*

2011-2015 **Athens College High School, Psychiko, Greece**
Completed International Baccalaureate Diploma Program in May 2015

Research Experience

2020-present **Graduate Research Assistant**, Stanford University

Advisor: *Prof. Kent Irwin*

Member of the Dark Matter Radio (DMRadio) collaboration. DMRadio is a series of experiments searching for ultra-light axions, with sensitivity to DFSZ axions in the 30-200 MHz (20-130 neV) range. Carrying out first experimental tests for DMRadio 50L and contributing to construction of the experiment. Optimizing final stages of design for maximum sensitivity reach DMRadio-m^3 as well as preliminary simulations for future DMRadio experiments.
Formerly in charge of cryogenic testing of Superconducting Quantum Interference Devices (SQUIDs) for cosmology projects, such as the BICEP Array.

2019-2020 **Graduate Research Assistant**, Stanford Institute for Theoretical Physics

Advisor: *Prof. Savas Dimopoulos*

Studied the physics and phenomenology of dense dark matter axion clumps (oscillons) in the context of oscillon-neutron star collisions. Using current sensitivity of radio telescopes, set limits on the abundance of oscillons in galactic dark matter halos in terms of the axion mass and symmetry breaking scale.

2016-2019   **Undergraduate Research Assistant**, UC Berkeley
Advisor: *Prof. Karl van Bibber*

Member of the *Haloscope at Yale Sensitive to Axion Cold Dark Matter (HAYSTAC)* collaboration. HAYSTAC is an experiment designed to search for μeV mass axions. Designed and refurbished microwave cavities used in experimental runs. Co-lead on refurbishment and optimization for cavity used in first fundamental physics result to evade the standard quantum limit. Introduced extensive use of finite element simulation techniques for characterization of axion haloscopes.

Teaching Experience

2021-present   **Mentor**, Polygence

One-on-one mentoring of high school students on research projects in their pre-collegiate schooling. Projects have involved studies of cosmologies with different density parameters as well as dark matter halo fits and simulations.

Head Teaching Assistant, Stanford University
Spring 2022   Physics 25 – Modern Physics (Instructor: Kent Irwin).

Teaching Assistant, Stanford University
Fall 2020   Physics 46 – Heat and Optics (Instructor: Giorgio Gratta).
Spring 2020   Physics 43 – Electricity and Magnetism (Instructor: Mark Kasevich).

Summer 2017   **Reader (Grader)**, UC Berkeley
Physics 137A – Quantum Mechanics I

Honors & Awards

2022   *Young Scientist Award* at *Identification of Dark Matter 2022*: One of best three talks (out of 90) given by graduate students and postdocs at the conference.
2019   Member of ΦBK
2018-2019   *Haas Scholar*: Received \$13,800 grant awarded to twenty UC Berkeley undergraduates across all disciplines to conduct research in their senior year.
2017-2018   *Berkeley Physics Undergraduate Research Scholar*
2016-2019   UC Berkeley *Dean's List*
2014   Member of the Greek National Linguistics Team: Participated in 12th International Linguistics Olympiad in Beijing, China.

Skills

Programming & Software

Languages:*Mathematica, Python, Matlab, LabVIEW*
Software: *COMSOL (AC/DC, RF, Heat Transfer), CST Microwave Studio, KiCad*
Other: LaTeX, HTML

Languages

English (native), Greek (native), German (advanced proficiency), French (elementary proficiency), Danish (elementary proficiency)

Experimental Tools

Operating and calibrating network analyzers for studies of electromagnetic devices, dips in liquid cryogens, operating dilution refrigerators, testing of quantum devices (e.g. SQUIDs), basic machine shop skills (operating mills, lathes, and drill presses for work on metallic parts)
